The Story of a Product

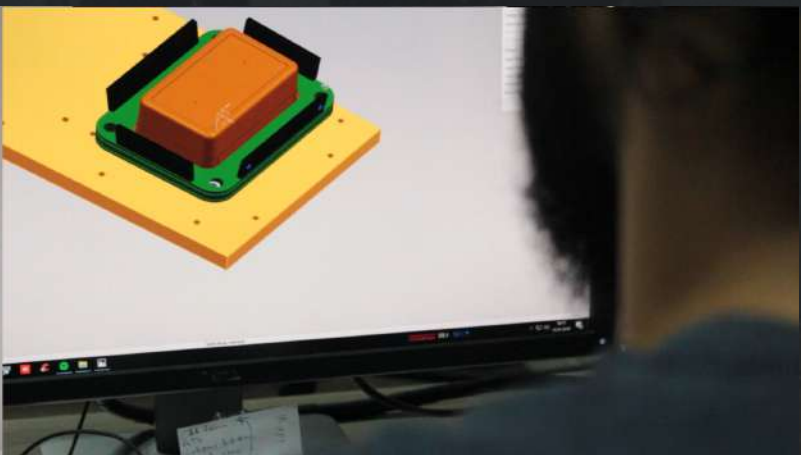

The Story of a Product

The story of a product begins with Delf. From A to Z carries the trace of Delf quality at every point.

3D Scanning

Precise measurement and quality control production with 3D scanner.

Product design & Create Mold

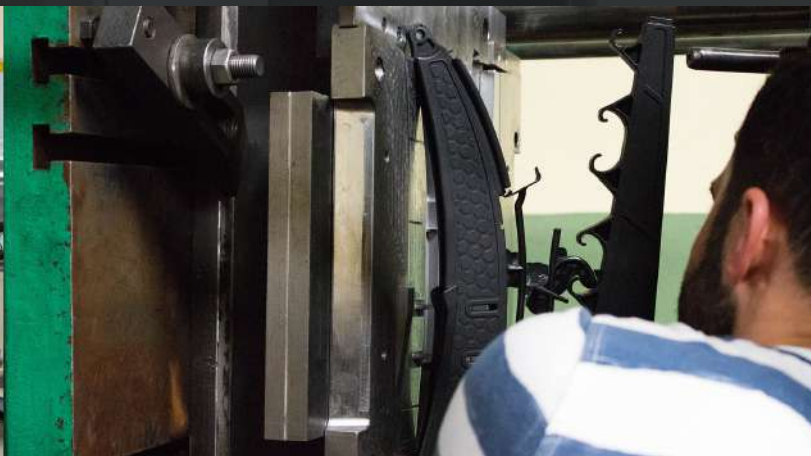

We design the product of your dreams for your production, We will mold your plastic injection products

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua.

Mold Manufacturing

Delf Mold Making uses advance tools and machines (e.g. CNC, Wire Cut, EDM etc.) to manufacture every mold with high precision and quality. Our experienced mold design and programming team analyses the samples provided by our customer to produce a design that combine customer's requirement with accuracy and productivity. The mold will then be manufactured by our trained machining staffs to obtain the final product. We are experienced in making all kind of molds, such as Rubber molds, Plastic molds, and Die-casting molds. The molds are tested before it is delivered to our customers.

Plastic Injections Manufacturing

Delf has injection molding machines, pressure ranging from 35 ton to 400 ton, and are all certified by ISO 9001:2015 and TSE Standard. Skilled technicians and computerized machines can guarantee that our finalized parts will meet the specifications set by our customers. The current parts that we supply to our customers include bicycle, bike, motorcycle, automotive, electronic, home appliance parts and others.

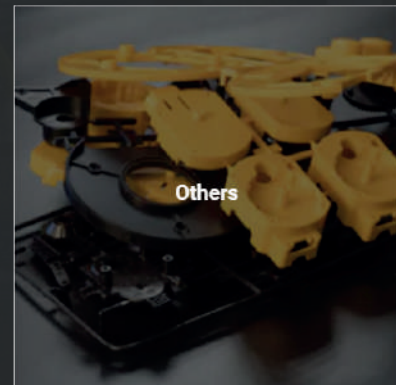

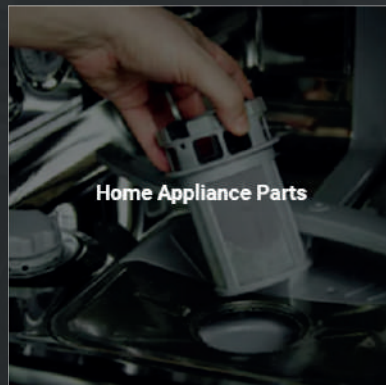

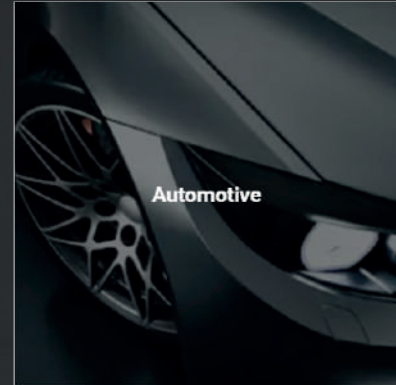

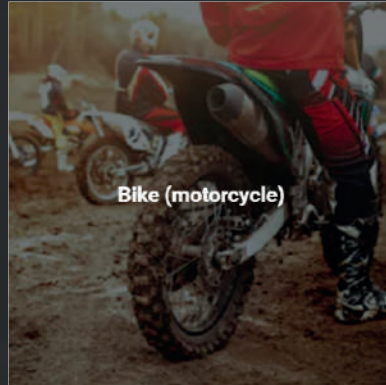

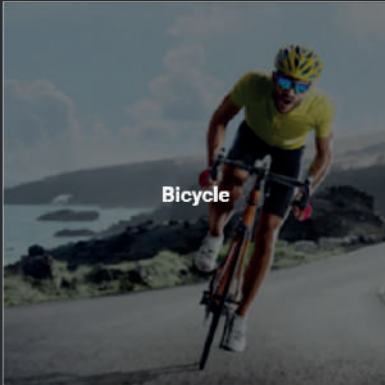

About Delf

DELf started its operations in 2016 with the participation of entrepreneurs with many years of experience in the sector.

Plastic injection molds, aluminum injection molds, spare parts manufacturing, plastic injection printing, product design – development, 3D printer prototyping, precision measurement and quality control under the same roof with production operations 3D scanner and progress towards continuous development.

We work efficiently with the leading companies of the sector at home and abroad. We are committed to providing the best and best quality products in the sector with our 1000 m2 modern facility.

By following technological developments, we are moving towards developing our products and products and we are becoming the “best of choice” in a short time
